

BSc Diagnostic Radiography

INFORMATION SHEET

Visiting a clinical department - this is one of the entry requirements for Diagnostic Radiography. This completed form will be considered as part of the application. It is not compulsory but is strongly advised.

The candidate must have pre-arranged the visit with a member of the Clinical Liaison Team in the Imaging department.

Before he/she will be allowed to visit the clinical department he/she must fill in the attached form and obtain a letter of introduction signed by his/her current course tutor or suitable professional (e.g. family doctor, teacher, solicitor etc...). He/she must take one form of formal photo identification (e.g. passport, driving licence) with him/her to the Department on the day of the visit, if not he/she will be turned away. If he/she is under 17 years of age at the time of the visit, his/her experience may be limited due to the regulations regarding radiation protection measures.

Mrs Ruth Wilkinson, Admissions Tutor, MSc, HDCR, DCR, PGCLTHE, FHEA.

Arranging attendance at a Sheffield Hallam University recognised Clinical Open Day in a Diagnostic Imaging Department

Some clinical departments are unable to offer work experience due to health and safety restrictions specific to that NHS Trust. As an alternative some departments are able to offer a structured 'Clinical Open Day' which will provide you with a taster of Diagnostic Radiography. You will be able to view the clinical environment, meet with clinical staff, talk to current students and observe some clinical examinations where this is practicable.

Attendance is by appointment only.

Chesterfield & North Derbyshire Royal Hospital NHS Trust Open Days

- Saturday November 15th 2014
- Saturday January 24th 2015

Criminal convictions

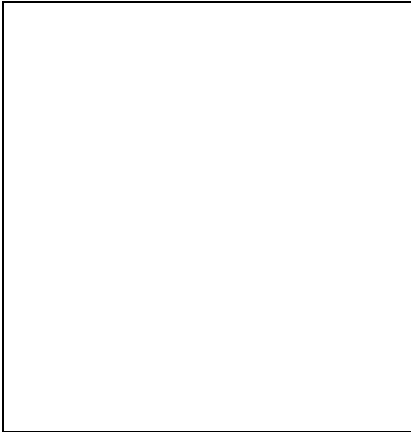

Certain criminal convictions and health problems may restrict you from employment within the Health Service. For the protection of patients, prospective students on a clinical visit need to be vetted.

Confidentiality

Whilst visiting the Department you may be in a position where you gain personal information about a patient. Such information is both sensitive and confidential and you must agree to respect that confidentiality before visiting the Department. Patient information covered by these rules includes the patient's name, address, medical and personal history and any diagnosed etc... Please do not discuss such information at a later date with family or friends. All patient information must be treated in the strictest confidence.

To be completed by referee (course tutor or appropriate professional) prior to visit.
