

Aims and Objectives of Course

The aims are to ensure that:

- a) students gain a BSc (Hon's) Diagnostic Radiography leading to eligibility for HPC registration and the requirements of first post employment.
- b) students understand their role and that of others within the health and social care team in delivering an effective user-focussed service
- c) students are enabled to integrate theory and practice through intellectual enquiry and reflective practice.
- d) students function as valued members of the health care services, to meet patients' needs and deliver the highest quality of service and patient centred care.
- e) interprofessional working and collaboration through interprofessional learning is encouraged.
- f) a sound understanding of the value and application of evidence to practice is provided.
- g) there is a commitment to life long learning through encouraging CPD, reflective practice and independent scholarship.
