

# i.Care - i.Learn

*Integrated care - Integrated learning*

*Year 1*

## *i.know...*

- My own professional role, and the role of other health and social care practitioners
- My own personal and professional values and attitudes
- How to reflect on my interprofessional working, learning and development needs
- The value of community and what it means, and can identify community assets, needs and can promote community driven health and social care
- The impact of the social determinants of health and social care
- About health and social inequalities and the impact on individuals, groups and communities
- How to promote diversity and inclusion
- The importance of identifying and working collaboratively to address the needs of individuals, groups and communities
- Biopsychosocial approaches for promoting health and wellbeing
- About holistic care delivery and integrated care services
- The value of collaborative working, effective team working and co-production

## *? i.need...*

- To experience interprofessional and collaborative team working
- To develop my communication skills through therapeutic conversations
- To be involved in decision making processes to achieve shared goals
- To experience working with other professionals, services, and agencies in the provision of patient-centred care.
- To develop my personal and professional confidence, capacity and resilience to work effectively across professional boundaries

## *u.can...*

- **Be Brave** – offer varied and alternative experiences to consolidate learning
- **Be Integrated** – enable students to experience varied ways of working, alongside different health and social care providers, and within diverse health and social care settings
- **Be Creative** – facilitate authentic experiences that promote engagement, understanding and build resilience
