

### ***i.comprehend...***

- Models and components of Integrated care services
- Increasing complexity when assessing individuals with multiple medical and social needs
- The challenges of health and care management for hard to reach and minority groups
- The challenges for collaborative working needed to support vulnerable individuals care e.g. Assessing capacity /complex discharge planning
- The need to empower and support individuals and families in decision making for their care
- How evidence-based co-ordinated interventions need to address complex health and social care needs
- How my professional reasoning needs to support decision making, and can complement those of other professions to enhance collaborative working
- Leadership concepts and can make judgements on approaches that could solve organisational problems which impact on person centred care
- How I can demonstrate and use my leadership skills in practice and reflecting on how I can enhance my leadership skills

### ***? i.need...***

- To undertake integrated assessments with other professionals to plan co-ordinated care
- To evaluate integrated care services and consider developments to enhance provision of care developments to enable or enhance provision of care for individuals or groups
- To experience importance of wider issues such as policy, legislation, law, ethical issues
- To be able to plan and deliver health promotions interventions or provision
- To experience wider aspects of health and social care such as funding
- To deal with uncertainty - to experience decision making in complex or unpredictable contexts where there may be ambiguity, challenges, or uncertainty
- To stretch my understanding of organisational challenges and problems - experience how leadership manages and problems solves

### ***u.can...***

- **Be Brave** – offer varied and alternative experiences to consolidate learning
- **Be Integrated** – enable students to experience varied ways of working, alongside different health and social care providers, and within diverse health and social care settings
- **Be Creative** – facilitate authentic experiences that promote engagement, understanding and build resilience
