

## MSc Nursing – Part Three Learning Outcomes

Learning journey. This is what you are expected to know or be able to do by the end of Part Three.

### Leadership

1. Evaluate clinical leadership and decision making for Nursing within contemporary health care practise.
2. Evaluate the role of education for the development of Nursing practise in the UK.

### Person Centred Care

1. Appraise my personal and professional development in clinical practice.
2. Apply and evaluate theoretical principles and evidence to the way I demonstrate the my ability to deliver compassionate and collaborative person centred care in the achievement of the NMC proficiencies

### Evaluating Complexity

1. Evaluate how knowledge and skills from allied professions [including your own] complement each other to provide integrated care.
2. Evaluate the impact of social media and technology on integrated care systems.

### Creating Evidence

1. Plan and implement an appropriate study investigating clinical practice.
2. Evaluate the implications of my findings for application to professional, practice.

### Assessment of Practice

1. Demonstrate the professional values, and proficiencies for the delivery of compassionate, person centred care in a team.

MYEPAD Workbook (Portfolio of Evidence)
